

# Ice Melt

Safe on asphalt and concrete

**ICE MELT** starts to work instantly, 2 to 5 times faster than rock salt and blended ice melters, generating heat on contact even in sub-zero temperatures down to -25°F. It is great for sidewalks, driveways, and parking areas and does not leave any white residue. It is gentle to lawns and concrete when used as directed, and will not burn dog paws like rock salt can. Independent testing has shown that **ICE MELT** contributes less to concrete scaling than other commonly used de-icers. **ICE MELT** keeps working even after other ice melters quit, and a little goes a long way, use much less than rock salt.

**Directions:** For excess humidity pour **ICE MELT** into mesh bag or dehumidifier to reduce excess humidity. For concrete add **ICE MELT** to aggregate and mix thoroughly. Results in higher early strength, improved workability, uniform cure, and much faster setting time. For weighting tractor tires mix **ICE MELT** with water which gives maximum weight and anti-freeze protection to 59°F below zero. For dust control spread **ICE MELT** uniformly over unpaved roadway, using 1 lb. per sq. yd. See label for more details.

**Areas of Use:**

- \*transit authorities
- \*cities and counties
- \*walkways
- \*parking lots
- \*streets
- \*road and streets departments
- \*stairs
- \*sidewalks
- \*driveways
- \*highways
- \*alleyways

Health	1
Flammability	0
Reactivity	0
Protection	N/A

Appearance and odor.....	Gray-White granules, odorless
Specific Gravity.....	N/A
VOC.....	N/A
NFPA Fire Rating.....	Non-Flammable
