

Mega Safe Bulk

Safety solvent

This product degreases electrical equipment, where cleaning and/or degreasing is accomplished when electrical current exists, or when there is a residual electrical potential from a component, such as a capacitor. Cleaning is quick and simple without the danger of injury to energized working parts. Can be sprayed into electric motors while in operation. Removes fluid, grease and oily contaminants from all energized electrical motors.

Physical Properties: Designed as a replacement for many solvents which are used in the final hand degreasing of finished parts. Because of its non-flammability, it is far superior to most solvents, such as ketenes, Naptha, etc. This product is designed to meet Military Specification MIL-S-18718.

Directions: Designed to be used "as is". It may be applied in a non-atomizing spray method, immersion, or by a hand wipe method. After cleaning, the parts may be allowed to dry without rinsing to expedite drying, depending upon atmospheric conditions. Air pressure is sometimes utilized. Can be applied to electric motors while in operation.

Areas of Use:

- *automotive parts
- *diesel engines
- *marine equipment
- *aircraft parts
- *industrial equipment
- *refrigeration equipment
- *generators
- *motors

Appearance and odor.....	Clear liquid
Specific Gravity.....	Concentrate - 1.44
VOC.....	Exempt Solvents
NFPA Fire Rating.....	Non-Flammable

Health	2
Flammability	0
Reactivity	0
Corrosive	0
