

# Patch-It

Aerosol rubberized coating and roof patch

This convenient synthetic rubber spray is all around weather protection in a can, no more hauling a five gallon bucket up the ladder for the smaller jobs! It can be used on roofs, gutters and downspouts, metal siding, construction trailers, and more to seal pin hole leaks, reinforce seams and thin spots, seal flashings and seal out rust and corrosion on all metal surfaces. **PATCH-IT** can also be used to seal pin-hole leaks in older condensate pans, and when sprayed onto new pans will seal out rust and corrosion, extending the life of the pan. **PATCH-IT** stays flexible because it contains synthetic rubber, will not freeze, peel, or crack in cold conditions and is impervious to water. **Available in Aluminum, Black and White.**

**Directions:** Sweep dust from area to be treated. Shake well. Hold can 10-12 inches from surface, for best results use multiple coats, allowing each coat to dry for 30 minutes between coats. Large breaks and cracks should be repaired by applying wire mesh or heavy mesh cloth before final coating. Each can covers approximately 20 square feet.

**Areas of Use:**

- \*gutters and downspouts
- \*metal siding
- \*roofs
- \*flashings
- \*municipalities
- \*building maintenance
- \*roofing departments
- \*schools
- \*vehicle undercoating
- \*pipes
