

Protect-It

Anti-graffiti
coating

PROTECT-IT coating resists graffiti marks on formica, linoleum, metal, finished wood, baked enamel and vinyl. Can also be used on concrete or brick surfaces, block walls, sidewalks and wood surfaces. Reduces corrosion from urine splash on restroom partitions and provides a glossy finish on hard surfaces. **PROTECT-IT** is great for use on vinyl bus seats, school desks and counters, washroom partitions, lockers, panels, refrigerators, tabletops, golf carts, boats, etc. **PROTECT-IT** is a non-chlorinated high gloss protective wax that is safe on plastics and protects against graffiti and spills. To remove graffiti prior to treating an area, use Omega's **MEGA OFF**, then spray entire surface with **PROTECT-IT**. Save time and money by protecting surfaces before it is too late.

Directions: Hold can 12 inches from surface when spraying. Wait 10 seconds for spray to dry. Wipe with clean dry cloth. Some inks may continue to show on surface but can be easily removed by spraying the area and wiping away.

Areas of Use:

- *school desks & counters
- *dumpsters
- *vinyl bus seats
- *washroom partitions
- *lockers
- *signs
- *bus stop areas
- *municipalities
- *school districts
- *areas prone to graffiti
