

IMC

Ice Machine Cleaner

Nickel Safe

IMC is a non-foaming, non-fuming cleaner that quickly removes scale from stainless steel and nickel plated steel. Contains special inhibitors to minimize corrosion, while effectively cleaning scale from all metal surfaces. **IMC** is USDA approved for use in federally inspected meat and poultry plants. Removes built-up lime scale eliminating the cause of equipment jamming and improves ice quality and capacity. Quickly removes lime scale, safe on nickel-plated and tin-plated evaporators, suitable for treating scaled-up water appliances.

Directions: Turn off ice machine. Drain water reservoir and refill with fresh water, adding 3 ounces of **IMC** per gallon of water. Start water circulating pump only and run 15-30 minutes. Use a brush to apply cleaner to scaled surface not adequately contacted by circulating solution. If scale is extra heavy, drain and repeat the cleaning procedure. After scale has been removed, drain and flush at least 2 or 3 times. For stainless steel ice machine drum, add 8 ounces of cleaner per one gallon of water in a plastic container and brush the solution on the scaled areas. After cleaning, flush all surfaces thoroughly with fresh water.

Areas of Use:

- *ice machines
- *coffee urns
- *portable heaters
- *humidifiers/dehumidifiers
- *vending equipment

Health	3
Flammability	0
Reactivity	0
Protection	B

Appearance and odor.....	Pink, clear liquid, mild acid odor
Specific Gravity.....	1.42
% Volatiles.....	100%
NFPA Fire Rating.....	Non Flammable
