

S.P.C.

Special Protective Coating
Helps Remove Snow with Less Effort

S.P.C. deposits a hard, slippery layer of silicone on plow blades and other snow removal equipment. Snow slides off treated surfaces easier and faster, allowing more snow to be moved with less fuel and less wear on equipment. In addition, the impervious silicone layer protects metal surfaces from rust and corrosion when in use and in storage.

Directions: Apply **S.P.C.** coating to plow blades and other exposed metal and painted surfaces by spraying, brushing or rolling. Equipment may be used immediately after application, but best results are obtained when **S.P.C.** is allowed to dry for 30 minutes. For maximum rust protection, apply coating at the end of each work period. Several applications over the summer storage periods will preserve equipment from corrosion. **S.P.C.** is ideal for use on shovels, loaders, snow throwers and truck beds to help prevent corrosion and allow easier dumping. Excellent for maintaining cutting blades.

Areas of Use:

- *Plow blades
- *Snow removal equipment
- *Truck beds

Health	1
Flammability	2
Reactivity	0
Protection	-

Appearance and odor.....	Clear, deep blue liquid with strawberry odor.
Specific Gravity.....	0.792
VOC.....	N/A
NFPA Fire Rating.....	Flammable
