

ALCO ZYME

Live Bacteria
w/ Odor Control

ALCO ZYME is a synergized blend of three Bacillus microorganisms for optimum enzymatic activity. Use it in garbage, grease traps, drain lines, garbage disposals, sinks, urinals, commodes, septic tanks, cesspools, R.V. holding tanks, pit toilets and portable toilets to digest grease, fat, oil, starch, detergent, organic wastes and paper. **ALCO ZYME** contains no harsh or corrosive chemicals and is completely safe to handle and store. It's biodegradable, too. It works in the presence or absence of oxygen and deodorizes as it cleans.

DIRECTIONS:

ALCO ZYME works within a pH range of 5.9 to 9.0 with the optimum pH near 7.5. Enzymatic activity increases with temperature up to 150°F and works down to 40°F. **Grease Traps & Septic Tanks:** Remove cover and pour 2 oz. of **ALCO ZYME** per inch diameter of drain directly into the grease trap and stir. Replace cover and resume normal use. Most traps require treatment daily, 2 oz. per diameter of drain. **Toilets:** Pour 2 gallons of water in the bowl to lower the water level. Pour **ALCO ZYME** under the rim and down the sides. Scrub under the rim and in the bowl **DO NOT RINSE**. Spray area on and around the toilet including walls and floors at least twice per day during peak use periods. **DO NOT RINSE**. **Urinals:** Spray area on and around urinals including walls and floors at least twice per day during peak use periods. **DO NOT RINSE** urinals. **Floors:** Spray floors and let **ALCO ZYME** set for 5 minutes. Rinse and then dry floors. Spray once per day during normal routine cleaning in hotels and motels. Regular maintenance using **ALCO ZYME** will eliminate lingering odors from uric acid. **Portable and Pit Toilets:** Apply 2 to 4 quarts of **ALCO ZYME** with enough water to cover solids. Maintain 4 to 16 oz. weekly. Repeat after pumping with the same procedure. Spray walls, floors and toilet during weekly or biweekly servicing. Do not rinse.

Health	0
Flammability	0
Physical Hazard	0
Protection	B

Areas of Use:

- *Hotels
- *Cities & Counties
- *Apartment Complexes
- *Hospitals
- *School Districts
- *Retirement Facilities
- *Plumbing Departments
- *Industrial Plants

Appearance & Odor.....	Milky white liquid with minty odor
Specific Gravity.....	1.02 +/- 0.02
Net Contents.....	1 US Gallon (3.79 L)
