

C & G

Caulking and Gasket Maker

C&G RTV Silicone Caulk and Sealant is a multipurpose, single component adhesive sealant that quickly adheres to most surfaces. **C&G** cures in 24 hours providing a tough, resilient, silicone rubber good for hundreds of applications. **C&G** can be used for gasketing, sealing, bonding, insulating, caulking, encapsulating and coating. This flexible material resists shrinking, cracking, weather, ozone, chemicals, moisture and vibration. **C&G** will remain permanently flexible and uses less material than squeeze tubes. **Available in Aluminum, White, Clear and Red.**

DIRECTIONS:

1. Surface must be clean and dry for best adhesive. 2. Hold the can at a 45° angle and apply a bead to the mating surface, encircling bolt holes. 3. For adhesion to both parts assemble at once. One part adhesion, allow 15 minutes for bead to skin. 4. Assemble parts. Do not squeeze gasket out by over tightening bolts. 5. Starts to cure at once, fully cures in 24 hours and reaches optimum strength in 7 days.

Areas of Use:

- *Caulk tubs, sinks, showers
- *Bonds carpet and upholstery
- *Seals around doors and windows
- *Weather stripping
- *Seals windshields
- *Seals exterior lights
