

Cannon

Non-Acid, Non-Fuming Drain Opener and Maintainer

CANNON is an easy to use non-acid, non-fuming drain opener, that requires no dangerous mixing and will not harm garbage disposals, plumbing or septic tanks. **CANNON** aids in the removal of organic obstructions like grease, cloth, hair, paper, and sludge. **CANNON** can also be used on a regular maintenance program to prevent sludge from building-up. **CANNON** is designed to be as strong as acid based drain openers without the harsh fumes or hazardous conditions that are associated with acids. **CANNON** is many times heavier than water so it will cut through and travel directly to the source of the problem.

Directions: Pour one pint (1/2 bottle) of **CANNON** directly into drain and allow to stand for 1/2 hour. Repeat if necessary. Extremely heavy grease stoppage may require overnight contact. Large industrial drains need 1 quart of **CANNON**. Let stand for 1/2 hour, flush and repeat if necessary. For preventative maintenance, use 1 pint of **CANNON** weekly to prevent sludge buildup. Do not use **CANNON** with any other drain openers.
