

H2 SUPER BLOCK W/METAL HANGER

Minimize H₂S Levels & Reduce Odors

H2 SUPER BLOCK is a super odor solution designed for large, smelly areas. **H2 SUPER BLOCK** contains H₂S (hydrogen sulfide) scavengers which are widely used in hydrocarbon processing facilities to maintain safety and eliminate odor emissions. **H2 SUPER BLOCK** is a powerful, long-lasting neutralizer for hydro gases. An effective deodorizer for sewers, elevator shafts, dumpsters, garbage collection areas and water treatment facilities. **H2 SUPER BLOCK** is designed to be a cost effective solution for a broad range of operating conditions and product compositions. Unique metal hanger makes this block much easier to hang safely & securely.

DIRECTIONS:

Remove **H2 SUPER BLOCK** from plastic bag. Hold block from the metal hanger and hang **H2 SUPER BLOCK** where foul odors are present and persistent. Position within the air-flow moving into the affected space for optimal performance. **H2 SUPER BLOCK** lasts up to 6 months of continuous use and shrinks over time. Do not submerge in water.

Health	1
Flammability	0
Physical Hazard	0
Protection	-

Areas of Use:

*Dump Sites
*Cities & Counties
*Elevator Shafts

*Water Treatment Facilities
*Garbage Collection Areas
*Waste Treatment Plants
