

Megaphene Plus

Disinfecting Spray

MEGAPHENE PLUS is one of the most unique disinfectant and deodorants of its kind. The blending of a phenol and a quaternary ammonium chloride allows **MEGAPHENE PLUS** to be classified as germicidal, fungicidal, staphylocidal, virucidal, tuberculocidal and pseudomonacidal. Kills HIV-1 (AIDS virus), Staphylococcus aureus (Staph), Streptococcus hemolyticus (Strep), Salmonella enterica, Influenza A & B virus, and more on hard surfaces. In addition, it is very effective to control mold and mildew on hard, non-porous surfaces. Janitorial companies can use **MEGAPHENE PLUS** to disinfect an area prior to cleaning in order to protect employees from spreading and carrying germs. Can even be used by tree care professionals to spray on chain saws and trimming equipment to prevent spreading diseases from one tree to another. **MEGAPHENE PLUS** both disinfects and deodorizes surfaces through effective bacteriacidal and fungicidal activity.

Directions: Shake well. Clean soil deposits from area to be treated with one of Omega's industrial strength cleaning products such as **SAFE CLEAN** or **MEGA CITRA FOAM**. Spray area with **MEGAPHENE PLUS** from a distance of 6-8 inches until area is moist. Allow to dry for a minimum of 10 minutes to ensure complete disinfection.

Health	2
