

MEGAPHENE CITRUS

Disinfecting Surface Spray

MEGAPHENE CITRUS is a powerful broad-spectrum disinfectant and deodorizer that provides germicidal, fungicidal, virucidal, tuberculocidal, staphylocidal, and pseudomonacidal activity. It is effective against a wide range of pathogens on hard, non-porous surfaces, including COVID-19, HIV-1 (AIDS virus), Staphylococcus aureus (Staph), Streptococcus hemolyticus (Strep), Salmonella enterica, and Influenza A & B viruses. In addition to its disinfecting capabilities, **MEGAPHENE CITRUS** helps control mold and mildew growth on hard, non-porous surfaces. Its fresh citrus scent makes it an excellent choice for use as a space-spray deodorizer and air freshener, leaving treated areas clean, disinfected and refreshed.

DIRECTIONS

For Disinfection Of Inanimate Surfaces: Clean object to be sprayed using usual cleaning methods. Hold dispenser upright and spray 6 inches from surface until the surface is wet. Treated surface must remain visibly wet for 10 minutes before wiping off.

For Sanitizing Inanimate, Non-food Contact Surfaces: Clean object to be sprayed using usual cleaning methods. Hold can upright and spray 6 inches from surface until the surface is wet. Treated surface must remain visibly wet for 20 seconds before wiping off.

For Sanitizing Soft, Non-food Contact Surfaces (fabrics): Spray until fabric is wet. **DO NOT SATURATE.** Fabric must remain visibly wet for 60 seconds. Let air dry. For difficult odors, repeat application. Do not apply on silk, rayon acetate or satin fabrics. Always test on a hidden area of fabric.

For Control Of Mold & Mildew: Clean object by using usual cleaning methods. Hold can upright and spray 6 inches from surface until the surface is visibly wet. Repeat application every seven days or when new growth appears.

For Space Deodorizer & Air Freshener: **HOLD CAN UPRIGHT** and point valve opening away from face. Spray upwards for three seconds into corners as well as center of the room, filling the room with mist.
