

Numb Nuts

Penetrating Lubricant with
Freezing Action

NUMB NUTS represents the latest breakthrough in penetrating lubricant technology. By combining rapid freezing action with an advanced rust eating formula, seized or rusted parts are easily released. Shrinkage of sprayed parts quickly breaks open micro fine fissures allowing the lubricant to easily penetrate even the toughest rust. The innovative XA-17™ rust eating technology dissolves rust, making the job a snap and future maintenance easier as well. Ideal for use in the most demanding penetrating lubricant applications including rusted manifold bolts, exhaust flanges, industrial, marine, farm, or other outdoor exposed equipment. This formula contains NO chlorinated solvents or ozone depleters and is nonconductive to 33,000 volts for use around live equipment. The 360° spray valve allows for use in any position and for access to hard-to-reach areas while the large pad actuator prevents freezing of fingertips. This is an ultra-low VOC content product.

Directions: Note: Sudden temperature drop can result in “thermal shock” which may cause crazing of some plastics and painted surfaces. Always test in an inconspicuous area before general use. Shake well before using. Insert extension tube provided. Spray liberally for 5-10 seconds on surface to be lubricated. Target the bolt, nut or part and limit the amount of contact to the surrounding area. Wait 30 seconds to allow temperature reduction and to facilitate penetration. Loosen or remove part. Repeat if needed.

Health	3
Flammability	3
Physical Hazard	2
Protection	-

Areas of Use:

- *Bathroom
- *Auto Repair Shop
- *Parks/Recreations
- *Hotels
- *Hospitals
- *School Districts
- *Amusement Parks

Appearance and odor.....	Colorless liquified gas, Solvent like odor.
Density	0.91 g/cm3
Net Wt.	9 oz.
