Paver's Friend

Water Soluble
Asphalt Release Agent

PAVER'S FRIEND is a unique blend of methyl soyate developed exclusively for Omega in order to meet the special needs of the asphalt paving industry. It is designed to replace diesel fuel for cleaning and asphalt release. You get all the benefits of diesel without the negative environmental impact. This water soluble formula is great for use in every aspect of the paving job. **PAVER'S FRIEND** is water rinseable, biodegradable, and is non-toxic. Use on truck beds, aprons, wands, emulsion tanks, hoppers, chains, conveyors, rollers, tires and in tool dip buckets. **PAVER'S FRIEND** can be used before any paving job as a release agent and after as a cleaner. When used before, surfaces will rinse clean with water. To clean hands tool handles, vinyl vehicle seats and door handles, and any other surface that has come into contact with grease, oil, tar, or asphalt during and after paving and potholing jobs, use Omega's **MUSCLEMAN** hand towels available for convenient one step cleaning.

Directions: Dilute with water to a maximum dilution ration of 10 to 1. When diluted 4 to 1 two quick loads can be done before reapplying. Shake well or agitate then apply diluted solution to empty beds of asphalt carriers, paving machinery and other equipment to make clean up quick and easy.
For best results, do not spray equipment and leave to soak overnight. **PAVER'S FRIEND** is fast acting and should be rinsed when cleaning or for release should be used in the morning before going out. **PAVER'S FRIEND** is completely biodegradable and will rinse clean with a simple water rinse.

Health	1
Flammability	1
Reactivity	0
Protection	N/A

Areas of Use:

 *Construction   *Slurry Seal Companies
 *Grounds Maintenance
 *Streets Departments
 *Road Repair Equipment

Appearance and odor........................	Liquid, light yellow with slight odor.
Specific Gravity.................................	0.88
Net Wt..	1, 5, 20, 30, 55, 275 Gallons
