This brief provides a general overview of the **Safety Data Sheet** requirements in the Hazard Communication Standard OSHA's 29 CFR 1910.1200(g) and Appendix D of 29 CFR 1910.1200).

Section 1 ~ Identification						
Identity (As Used On Label and List)		Date Prepared:				
B4013 PLASTIKMAN		08-03-2018				
Company Information:		Emergency Telephone Number:				
OMEGA INDUSTRIAL SUPPL	Y, INC 1-8	1-800-424-9300				
Address (Number, Street, Suite/Ap	t#) Tel	Felephone Number for Information:				
101 Grobric Ct #1	1-8	1-800-571-7347				
(City, State, and Zip Code)	Sig	nature of Prepare (Optional)				
Fairfield, CA 94534	RE	EGULATORY DEPT.				
Section 2 ~ Hazard(s) Identifica	tion					
OSHA/HCS Status	This material is considered hazardous by the OSHA	A Hazard Communication Standard (29 CFR 1910.1200).			
Classification of the Substance or Mixtur	e SKIN IRRITATION - Category 2					
	EYE IRRITATION - Category 2A					
	SPECIFIC TARGET ORGAN TOXICITY (SINGI	LE EXPOSURE) (Respiratory tract irritation) - Categor	v 3			
GHS Label Elements	``````````````````````````````````````		-			
\wedge						
Label Elements Signal Word: Warning!						
•	• · · · · · · · · · · · · · · · · · · ·					
Hazard Statement Causes seri	ous eve irritation. Causes skin irritation. May cause an all	ergic skin reaction May cause respiratory irritation				
Precautionary Statement		orgie shin reaction. Thay cause respiratory mination				
Prevention Wear protectiv	<i>Prevention</i> Wear protective gloves. Wear eye or face protection. Use only outdoors or in a well ventilated area. Avoid breathing dust. Wash hands thoroughly after handling.					
Contaminated	work clothing must not be allowed out of the workplace.					
<i>Response</i> IF INHALEL with plenty of	soap and water. Wash contaminated clothing before reuse	atning. Call a POISON CENTER of physician if you for If skin irritation or rash occurs: Get medical attention	IF IN EYES: Rinse cautiously			
with picing of soup and water. Wash containing before rease. If skin initiation of rash occurs, bet medical attention. IF IV ETES, Rhise cautously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.						
Storage Store locked u	Storage Store locked up.					
Disposal Dispose of contents and container in accordance with all local, regional, national and international regulations.						
Hazards not Otherwise Classified None known.						
Section 3 ~ Composition/Inform	nation on Ingredients					
Substance/Mixture: Mixture						
Name		CAS No.	%(Wt.)			
4,4'-Isopropylidenediphenol, oligometric re acids C18-unsatd dimets	action products with 1-chloro-2, 3-epoxypropane, reaction	n products with fatty -	10 - 30

crystalline silica non-respirable	14808-60-7	0.1 - 1
Canada		
Talc, not containing asbestiform fibres	14807-96-6	30 - 60
Nepheline syenite	37244-96-5	10-30
Titanium Dioxide	13463-67-7	1-5
2,4,6-tris(dimethylaminomethyl)phenol	90-72-2	1-5
crystalline silica, non-respirable	14808-60-7	0.1 - 1
Occupational exposure limits, if available, are listed in Section 8.		

Section 4 ~ First Aid Measures

Description of Necessary First Aid Measures

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Skin Contact: Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Eye Contact: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

Ingestion: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Most Important Symptoms/Effects, Acute and Delayed Potential Acute Health Effects

Inhalation: May cause respiratory irritation.

Skin Contact: Causes skin irritation. May cause an allergic skin reaction.

Eye Contact: Causes serious eye irritation.

Ingestion: No known significant effects or critical hazards.

Over-Exposure Signs/Symptoms

Inhalation: Adverse symptoms may include the following: respiratory tract irritation. Coughing.

Skin Contact: Adverse symptoms may include the following: Irritation redness

Eye Contact: Adverse symptoms may include the following: pain or irritation watering redness

Ingestion: No specific data.

Indication of Immediate Medical Attention and Special Treatment Needed, if Necessary

Notes to Physician: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. Specific Treatments: No specific treatment.

See Toxicological Information (Section 11)

Section 5 ~ Fire Fighting Measures

Suitable Extinguishing Media: Use an extinguishing agent suitable for the surrounding.

Unsuitable Extinguishing Media: None known.

Specific Hazards Arising from the Chemical: No specific fire or explosion hazard.

Hazardous Thermal Decomposition Products: Decomposition products may include the following materials: carbon dioxide, carbon monoxide, nitrogen oxides, sulfur oxides, halogenated compounds, metal oxide/oxides

Special Protective Actions for Fire-Fighters: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special Protective Equipment for Fire-Fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode

Section 6 ~ Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures

For Non-Emergency Personnel: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For Emergency Responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

Environmental Precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and Materials for Containment and Cleaning Up

Small Spill: Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.

Large Spill: Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7 ~ Handling and Storage

Conditions for Safe Storage, Including any Incompatibilities: Do not store above the following temperature: 35°C (95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Precautions for Safe Handling

Protective Measures: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on General Occupational Hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures

Section 8 ~ Exposure Controls/Personal Protection

Form: [a]Respirable fraction [b]Respirable particulate [c]Respirable [d]Respirable fraction. [e]Respirable dust. [f]respirable fraction [g]Total dust [h]Respirable dust [i]Total dust. Appropriate Engineering Controls: Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Environmental Exposure Controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. **Individual Protection Measure**

Hygiene Measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Respiratory Protection: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Skin Protection

Hand Protection: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body Protection: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other Skin Protection: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Eye/Face Protection: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Section 9 ~ Physical and Chemical Properties

Physical State: Solid. Color: Blue -White. [Light] Odor: Pungent. Sulfurous. [Strong] Odor Threshold: Not available. pH: Not applicable. Melting Point: Not available. Boiling Point: Not available. Flash Point: Closed cup: > 93.3°C (> 199.9°F) [Setaflash.] [Product does not sustain combustion.] Evaporation Rate: Not applicable. Flammability (solid, gas): Not available. Lower and Upper Explosive (flammable) Limits: Not available. Vapor Pressure: Not available. Vapor Density: Not available. Relative Density: 1.793 Solubility: Easily soluble in the following materials: methanol and acetone. Insoluble in the following materials: cold water and hot water. Solubility in Water: Not applicable Auto-Ignition Temperature: Not available. Decomposition Temperature: >220°C (>428°F) Viscosity: Kinematic (room temperature): Not applicable. Kinematic (40°C (104°F)): Not applicable.

Section 10 ~ Stability and Reactivity

Reactivity: No specific test data related to reactivity available for this product or its ingredients.

Chemical Stability: The product is stable. Possibility of Hazardous Reactions: Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to Avoid: No specific data.

Incompatible Materials: No specific data.

Hazardous Decomposition Products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11 ~ Toxicological Information

Information on Toxicological Effects					
Acute Toxicity					
Product/Ingredient Name	Result	Species		Dose	Exposure
2,4,6-tris (dimethylaminomethyl)phenol	LD50 Dermal	Rabbit		1280 mg/kg	-
	LD50 Oral	Rat		1653 mg/kg	-
Irritation/Corrosion					
Product/Ingredient Name	Result	Species	Score	Exposure	Observation
titanium dioxide	Skin – Mild irritant	Human	-	72 hours 300 Micrograms Intermittent	-
2,4,6-tris (dimethylaminomethyl) phenol	Skin – Severe irritant	Rabbit	-	-	-
	Eyes - Severe irritant	Rabbit	-	-	-
Sensitization					
Product/Ingredient Name	Route of Exposure	Species		Result	
2,4,6-tris (dimethylaminomethyl) phenol	Skin	Guinea Pig		Not sensitizing	

Mutagenicity: No specific data.

Carcinogenicity: No specific data.

Conclusion/Summary: IARC classifies TiO2 as a 2B carcinogen based in large part on several studies of the effects of the inhalation of TiO2 on animals in which the TiO2 particles were of various sizes. Particles defined as "ultrafine" have been shown to cause cancer in animals exposed to very high concentrations. A number of authorities have reviewed those studies and others involving exposure to ultrafine particles and have concluded that the effects result from overloading the respiratory system of the animals. The effects observed, according to the scientists, are not due to TiO2 but are general responses to high levels of dust in the lungs. In addition, a carcinogenic effect of TiO2 dust in the workers was not observed in several epidemiology studies on more than 20,000 TiO2 industry workers in Europe and the USA, nor were other chronic diseases, including other respiratory diseases, associated with exposure to TiO2 dust. Accordingly, we have concluded that our products should not be classified on the basis of the presence of TiO2 in the products. This product contains talc in a polymer matrix. Sanding the cured product may release particles containing talc with the polymer and other components of the matrix into the air. The talc contains less than 1% crystalline silica. Appropriate evaluations of the use of the product should be performed to determine if exposure to talc occurs due to handling and use. If such exposures occur, appropriate precautions must be taken to prevent exposure in excess of the OSHA Permissible Exposure Limit (PEL). **Classification**

Canada Canadian Lists Canadian NPRI: None of the components are listed. CEPA Toxic Substances: None of the components are listed. EU Regulation (EC) No. 1907/2006 (REACH) Substances of Very High Concern: None of the components are listed. **Inventory List** Australia: All components are listed or exempted. Canada: Not determined. China: All components are listed or exempted. Europe: Not determined. Japan: Japan inventory (ENCS): Not determined. Japan inventory (ISHL): Not determined. Republic of Korea: All components are listed or exempted. Malaysia: Not determined. New Zealand: Not determined. Philippines: Not determined. Taiwan: Not determined. Turkey: Not determined. United States: All components are listed or exempted. Thailand: Not determined. Viet Nam: Not determined

Section 16 ~ Other Information

Key to Abbreviations:

ATE = Acute Toxicity Estimate BCF = Bioconcentration Factor

GHS = Globally Harmonized System of Classification and Labelling of Chemicals

IATA = International Air Transport Association

IBC = Intermediate Bulk Container

IMDG = International Maritime Dangerous Goods

LogPow = logarithm of the octanol/water partition coefficient

MARPOL 73/78 = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution) UN = United Nations
