

Safe Clean

Acid Replacement Cleaner

SAFE CLEAN is a non-acid, heavy duty concrete cleaner and stain remover. It replaces acid and acid-blend products to take care of a large variety of cleaning and maintenance problems in a safe manner for both users and surfaces. **SAFE CLEAN** is a viscous liquid that clings to the surface to be cleaned, which increases dwell time and allows for efficient cleaning of verticle and slanted surfaces. **SAFE CLEAN** will remove even tough stains like rust, calcium deposits, soap scum, lime, mildew, oil and other difficult to remove soil and stains. **SAFE CLEAN** is not hazardous, corrosive or toxic, and is safe enough to use on aluminum, stainless steel, copper, fiberglass, terrazzo, marble, glass, porcelain, tile, grout and much more. Non-fuming, non-flammable, biodegradable and contains no VOC's. After cleaning concrete, use Omega's **SAFE STEP** on stairs and slanted walkways to provide a safer, slip resistant surface.

Directions: Use **SAFE CLEAN** full strength or dilute up to 10:1 depending on the job at hand. Wipe or spray product onto the surface to be cleaned and let stand for a few minutes. Agitate with brush or sponge to remove soil, then wipe clean or rinse with water.
