

BELT-TITE

Belt Dressing

BELT-TITE is a powerful pinpoint spray that can be safely applied to both sides of power transmission belts even while in motion. Treatment eliminates belt slippage, increasing equipment efficiency and lengthening belt life. **BELT-TITE** will not glaze and does not attract dust or dirt. Effective against indoor and outdoor environmental conditions. **BELT-TITE** is useful on all types of belts: "V" Type, Flat, Round, Made of Leather, Rubber, Fabric and Synthetic Material. Features a 360° valve that allows spraying with can held in upright or inverted position.

DIRECTIONS:

NOTE: In many instances protective guards must be removed in order to apply belt dressing properly. In such cases please use extreme care to prevent accidents. Be sure to replace guards after treatment. Apply a little at a time to inner surface of belt while machinery is in motion. Spray using a back and forth motion until the surface is completely wet. On most belts, the spray may be applied to the sheaves, pulleys or directly onto the belt itself. Repeat occasionally to maintain full power and to optimize belt life.
