

DAD DEFENDING AGAINST DRUGS

Opioid Destroyer

DAD DEFENDING AGAINST DRUGS destroys on contact: Fentanyl, Heroin, Oxycodone and Synthetic Opioid. **DAD** Instantly neutralizes opioid residue on surfaces ensuring safety in various environments. It is suitable for application in vehicles, interrogation rooms, holding cells and other critical areas. **DAD** has a simple application that requires minimal training and effort. **DAD** works rapidly to eliminate opioid contamination, reducing downtime and risk of exposure. It is safe for use in enclosed spaces with no harmful chemicals or fumes. It helps meet safety regulations and protocols for handling opioid related incidents. **DAD DEFENDING AGAINST DRUGS** provides confidence in the environment, enhancing overall safety and well-being.

DIRECTIONS:

Wear nitrile gloves, N-95 mask and eye protection. Place a dry towelette over the opioid residue to prevent it from becoming airborne. Completely soak the towelette and surrounding area with **DAD** and let it sit for at least 2.5 minutes. When using **DAD** pre-moistened wipes, allow the wipe to saturate the area for at least 2.5 minutes. Safely gather the towelette over the area with the heaviest contamination and dispose of the towelette safely. Spray the surface down one more time and wipe clean. Dispose of materials properly.

Health	1
