

DEFOAMER

Anti-Foaming Agent
Concentrated Formula

DEFOAMER is a water soluble foam controller. This product may be used around sewage treatment plants for foam knock down, dripped into waste streams where foam is a problem, and used to eliminate foam in aerator tanks. At public places such as buildings, offices, golf courses, and apartments, **DEFOAMER** can be added to fountains and waterfalls to reduce foam problems. When used properly and on a regular basis this additive eliminates foam completely. **DEFOAMER** can be mixed with detergents to reduce foam for use in scrubbers, power washers, etc. without affecting the detergency of the solution.

DIRECTIONS

Add one ounce of **DEFOAMER** per 5 gallons capacity to recovery tank of wet vacuums, carpet extraction equipment and automatic scrubbers. For additional control, dilute 50:50 and spray inside wall of recovery hoses. If necessary, this solution may be sprayed directly on foam for removal.
