

FOAMY LUBE

Foaming Chain and
Cable Lubricant

FOAMY LUBE sprays as an instant foaming, deep penetrating liquid that flows inside intricate chains and cables where the greatest stress occurs. **FOAMY LUBE** provides a thick foam that clings to vertical surfaces. As foam breaks, lubricant penetrates into wire rope, rollers, pins, links and bushings of chains. **FOAMY LUBE** leaves a lubricating film, which reduces friction, wear and corrosion. When applied to wire ropes and cables, the Moly* and other additives plate the strands to provide anti-wear and rust protection. (*Moly is molybdenum disulfide).

DIRECTIONS

SHAKE WELL. Shake can for 1 minute before using. For proper spraying, can should be near room temperature (about 72°F / 22°C). Parts to be sprayed should be reasonably clean and dry. Spray, holding can 8 to 10 inches from point to be lubricated. Make sure arrow on spray tip points away. For point lubrication, use plastic extension tube, insert into nozzle for reaching places where a spray pattern is not desired. A second coat provides additional protection.

Health	*3
Flammability	4
Physical Hazard	0
Protection	B

Areas of Use:

*Aircraft Maintenance	*Cranes	*Material Handling
*Chains and Cables	*Drag Lines	*Open Gears
*Chainsaws	*Hoists and Winches	*Sprocket
*Construction Mining	*Industrial Facilities	*Tow Lines

Appearance & Odor.....	Liquid, odor not available
VOC%.....	20.1%
Net Contents.....	16 OZ (453 Grams)
