

# NEW NUTS

Thread Reconstruction Penetrant

**NEW NUTS** is a thread reconstruction penetrant that embraces nano technology to create a product that outperforms conventional lubricants, penetrants and products. In the past, when threads were damaged it required a cutting torch or the drilling out of bolts. Now with **NEW NUTS**, threads are reconstructed using nano technology to allow for complete disassembly.

#### DIRECTIONS

Shake can prior to use. Spray on damaged thread area. Begin disassembly. Depending on thread damage multiple applications may be required between turns. Continue to spray and turn until equipment is disassembled.
