

SINGLEMAN

Individually Packaged
Hand Cleaning Wipe

SINGLEMAN is a convenient hand cleaner/towel combination that eliminates the need for soap and water. These convenient individually packaged towels are saturated with a special heavy-duty hand cleaning solution. The thick textured towels aid in deep cleaning soils from hands and encapsulating the lifted dirt while the hand cleaning solution effectively dissolves grease, grime, oil, lubricants, paints, inks, adhesives, tar and more. **SINGLEMAN** does not contain any strong solvents that may dry out the skin and rob it of essential fluids. Each towel contains Aloe Vera, Glycerin, Vitamin E, Jojoba, Wheat Germ Extract and an antiseptic agent that will help prevent infection. The cleaning agent is solvent free and VOC free. **SINGLEMAN** can be used to clean all non-porous surfaces such as tools, equipment, and much more. Great for removing tar and asphalt from shovel handles too. Unlike many other industrial hand cleaning towels, **SINGLEMAN** hand towels do not contain any hazardous ingredients!

DIRECTIONS

Wipe hands or surface completely and dispose of towel in the trash.
