

Tombstone

Wasp & Hornet Spray

TOMBSTONE provides immediate knock down of wasps, hornets and yellow jackets with a high delivery spray tip that directs a powerful stream of product to wasps' nests. **TOMBSTONE** has residual killing action so insects returning to a treated nest will also be killed. The jet spray reaches nests up to 20 feet above the ground. **TOMBSTONE** is an electrically non-conducting with a dielectric breakdown voltage of 49,500 volts. This fast acting spray can be used indoors or outdoors and will not stain walls or ceilings. Contains no CFCs or other ozone depleting substances. **TOMBSTONE** can also be used around points where insects enter such as outside plumbing, or cracks and crevices, to prevent them from entering in the first place.

Directions: For best results, spray early in the morning or late in the evening when insect activity is minimal. Spray toward nest with wind at your back until nest is thoroughly saturated. Wait at least 24 hours before removing the nest to ensure insects returning to the nest will be killed.

Health	2
Flammability	4
Physical Hazard	0
Protection	G

Areas of Use:

- *Warehouses
- *Storage Areas
- *Parks/Recreations
- *Hotels
- *Apartment Complexes
- *School Districts
- *Amusement Parks
- *Anywhere insects have made their nest

Appearance and odor.....	Clear spray/mist, Solvent odor.
VOC Content(wt%).....	98%
Net Wt.	14 oz.
