

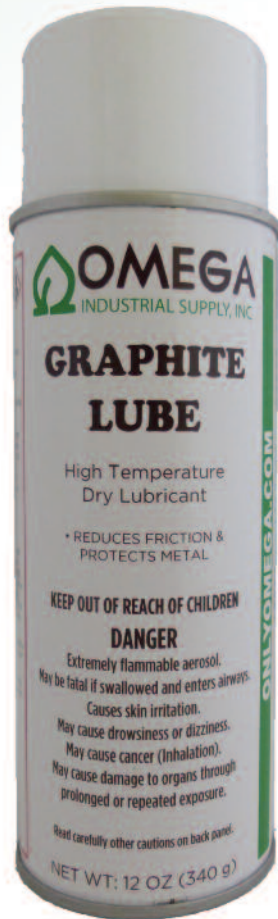

Graphite Lube

High Temp Dry Graphite Lubricant

GRAPHITE LUBE is an aerosol, extra duty, high temperature, dry lubricant that is portable and easy to use. When used as directed, **GRAPHITE LUBE** will leave a thin film layer of graphite that not only lubricates, but penetrates deeply into difficult areas to protect metal and reduces friction and squeaking from tools, hardware, and accessories.

Directions: Shake well before using. Hold nozzle 6 - 8 inches from surface requiring lubrication. Generously apply to surface requiring lubrication. Reapply as necessary to maintain lubrication level. Clean nozzle after each use by inverting can and spraying.

Areas of Use:

Health	3
Flammability	4
Reactivity	0
Protection	-

- *Industrial Plants
- *Shipyards
- *Fork Lift Masts
- *Ladle Pins
- *Rollers
- *Mining Operations

- *Cold Storage
- *Fleet Vehicles
- *Bushings
- *Lug Bolts
- *High Speed Open End Shafts

Appearance and Odor.....	Grey liquid, Hydrocarbon odor
VOC Content	< 85 %
Net Wt	12 OZ
