Section 1 ~ Identification

Identity (As Used On Label and List) A1252 Mist, Pina Colada

Company Information: OMEGA INDUSTRIAL SUPPLY, INC

Address (Number, Street, Suite/Apt#) 101 Grobric Ct #1
(City, State, and Zip Code) Fairfield, CA 94534

Date Prepared: 03-18-2015

Emergency Telephone Number: 1-800-424-9300

Telephone Number for Information: 1-800-571-7347

Signature of Prepare (Optional) REGULATORY DEPT.

Section 2 ~ Hazard(s) Identification

Classification Specific Target Organ Toxicity - Single Exposure (Narcotic Effects) - Category 3
Eye irritation - Category 2A
Acute toxicity Oral Category 5
Aerosol - Category 1

Label elements

Signal Word: Danger

Hazard Statement Physical H222, H229 - Extremely flammable aerosol, Pressurized container may burst if heated

Hazard Statement Health H303 - Maybe harmful if swallowed
H319 - Causes serious eye irritation
H336 - May cause drowsiness or dizziness

Precautionary Statement General P101 - If medical advice is needed, have product container or label at hand.
P102 - Keep out of reach of children.
P103 - Read label before use.

Prevention P264 - Wash thoroughly after handling.
P280 - Wear protective gloves/protective clothing/eye protection/face protection.
P261 - Avoid breathing dust/fume/gas/mist/vapors/spray.
P271 - Use only outdoors or in a well-ventilated area.
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211 - Do not spray on an open flame or other ignition source.
P251 - Do not pierce or burn, even after use.

Response P312 - Call a POISON CENTER or doctor/physician if you feel unwell.
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313 - If eye irritation persists: Get medical advice/attention.
P304 + P400 - IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P304 + P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P304 + P351 - IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P403 + P405 - Store in a well-ventilated place. Store locked up.
P410 - Protect from sunlight.
P412 - Do not expose to temperatures exceeding 50°C/122°F.

Disposal P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

Section 3 ~ Composition/Information on Ingredients

Components (Specific Chemical Identity, Common Name(s)) CAS No. % (Wt)
Acetone 67-64-1 46 – 81%
Propane 74-98-6 19 – 34%

Section 4 ~ First Aid Measures

Eyes — Remove source of exposure or move person to fresh air. Rinse eyes cautiously with lukewarm, gently flowing water for several minutes, while holding the eyelids open. Remove contact lenses, if present and easy to do. Continue rinsing for a duration of 15-20 minutes. Take care not to rinse contaminated water into the unaffected eye or onto the face. If eye irritation persists: Get medical advice/attention.

Skin — Take off immediately all contaminated clothing, shoes and leather goods (e.g. watchbands, belts). Gently blot or brush away excess product. Wash with plenty of lukewarm, gently flowing water for several minutes, while holding the eyelids open. Remove contaminated clothing and protective equipment before handling.

Ingestion — Rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER/doctor. If vomiting occurs naturally, lie on your side, do not sit up but remain lying flat and quiet.

Section 5 ~ Fire Fighting Measures

Suitable Extinguishing Media - Use water, fog, dry chemical, or carbon dioxide. Carbon dioxide can displace oxygen. Use caution when applying carbon dioxide in confined spaces.

Unsuitable Extinguishing Media - Water may be ineffective but can be used to cool containers exposed to heat or flame.

Specific hazards in Case of Fire — Contents under pressure. Keep away from ignition sources and open flames. Exposure of containers to extreme heat and flames can cause them to rupture often with violent force. Aerosol cans may rupture when heated. Heated cans may burst. In fire, will decompose to carbon dioxide, carbon monoxide.

Fire-fighting equipment/instructions — Isolate immediate hazard area and keep unauthorized personnel out. Stop spill/release if it can be done safely. Move undamaged containers from immediate hazard area if it can be done safely. Water spray may be useful in minimizing or dispersing vapors and to protect personnel. Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

Specific protective actions — Wear protective pressure self-contained breathing apparatus (SCBA) and full turnout gear. Care should always be exercised in dust/mist areas.

Section 6 ~ Accidental Release Measures

Emergency Procedure — Flammable/combustible material. ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). Stay upwind; keep out of low areas. Immediately turn off or isolate any source of ignition. Keep unnecessary people away; isolate hazard area and deny entry. Do not touch or walk through spilled material. Clean up immediately. Use absorbent sweeping compound to soak up material and put into suitable container for proper disposal.

Recommended Equipment — Positive pressure, full-face piece self-contained breathing apparatus (SCBA), or positive pressure supplied air respirator with escape SCBA (NIOSH approved).

Personal Precautions — ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). Use explosion proof equipment. Avoid breathing vapor. Avoid contact with skin, eye or clothing. Do not touch damaged containers or spilled materials unless wearing appropriate protective clothing.

Environmental Precautions — Stop spill/release if it can be done safely. Prevent spilled material from entering sewers, storm drains, other unauthorized drainage systems and natural waterways by using sand, earth, or other appropriate barriers.

Section 7 ~ Handling and Storage

General — For industrial and institutional use only. Use by trained personnel only. Keep away from children. Wash hands after use. Do not get in eyes, on skin or on clothing. Do not breathe vapors or mists. Use good personal hygiene practices. Eating, drinking and smoking in work areas is prohibited. Remove contaminated clothing and protective equipment before entering eating areas. Eyewash stations and showers should be available in areas where this material is used and stored.

Ventilation Requirements — Use only with adequate ventilation to control air contaminants to their exposure limits. The use of local ventilation is recommended to control emissions near the source.
Section 8 ~ Exposure Controls/Personal Protection

Appropriate engineering controls – Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value.

Respiratory Protection—If engineering controls do not maintain airborne concentrations to a level which is adequate to protect a worker, a respiratory protection program that meets or is equivalent to OSHA 29 CFR 1910.134 and ANSI Z88.2 should be followed. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and vapors. When spraying more than one half can continuously or more than one can consecutively, use NIOSH approved respirator.

Eye/face protection—Chemical goggles, safety glasses with side shields or vented/splash proof goggles. Contact lenses may absorb irritants. Particles may adhere to lenses and cause corneal damage.

Skin Protection—Wear gloves, long sleeved shirt, long pants and other protective clothing as required to minimize skin contact. Use of gloves approved to relevant standards made from the following materials may provide suitable chemical protection: PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Chemical-resistant clothing is recommended to avoid prolonged contact. Avoid unnecessary skin contact.

Section 9 ~ Physical and Chemical Properties

Boiling Point: N/A

Vapor Density: Slower than ether

Density: 0.66323 lb/gal

Solubility in Water: Not applicable

Appearance and Odor: Pina colada odor.

Flash Point (Method Used): Flashpoint below 73°F

Water Disposal: Under RCRA, it is the responsibility of the user of the product, to determine a the time and manner of disposal whether the product meets RCRA criteria for hazardous waste. Waste management should be in full compliance with federal, state, and local laws. Empty containers retain product residue which may exhibit hazards of material, therefore do not pressurize, cut, glaze, weld or use for any other purposes. Return drums to reclamation centers for proper cleaning and reuse.
