

New Nuts

Thread Reconstruction Penetrant

NEW NUTS is a thread reconstruction penetrant that embraces nano technology to create a product that out performs conventional lubricants, penetrants and products. In the past, when threads were damaged it required a cutting torch or the drilling out of bolts. Now with **NEW NUTS**, threads are reconstructed using nano technology to allow for complete disassembly.

Directions: Shake can prior to use. Spray on damaged thread area. If threads are severely damaged additional applications may be necessary to complete disassembly. Continue to spray and turn until the equipment is disassembled.

Health	1
Flammability	1
Physical Hazard	0
Protection	None

Areas of Use:

- *Nuts
- *Bolts
- *Pipe connections
- *Pipe threads
- *Machine shops

Appearance and odor.....	Clear, amber fluid, mild odor.
Specific Gravity.....	0.90 - 0.92
VOC.....	N/A
