

Omega Winter Guard

Prevents ice build-up

OMEGA WINTER GUARD is a newly developed ice repellent that will stick to any surface, thus preventing ice build-up or adherence. **OMEGA WINTER GUARD** does not run off like low viscosity products, giving maximum ice prevention at minimum product consumption.

DIRECTIONS: Do not dilute. For most economical coverage, use a pressure sprayer. Put a coating of **OMEGA WINTER GUARD** before or at the start of icing conditions, for best control. Large amounts of snow or rain may necessitate re-application. **OMEGA WINTER GUARD** works fastest and most effectively on thin layers of ice. If ice build-up is heavy, score the ice first and then pour or spray **OMEGA WINTER GUARD** into the cracks. **OMEGA WINTER GUARD** can be used with chloride or urea based ice melters for rapid penetration. **OMEGA WINTER GUARD** will break the ice bond to your surface.

Health	0
Flammability	0
Physical Hazard	0
Protection	A

Areas of Use:

- *Railroad switches
- *Coal belts
- *Link-belts
- *Any vertical or sloping surface

Appearance and odor.....	Clear, moderately viscous blue liquid gel, odor nondescript.
Specific Gravity.....	1.01
% Volatile by Volume.....	N/A
