

Patch It

Aerosol Rubberized Coating and Roof Patch

PATCH-IT is multi-purpose continuous coating instant leak sealer. **PATCH IT** can be applied to any surface to provide a waterproof flexible continuous rubber coating that will stop leaks and act as a barrier against moisture, rust, and corrosion. Once applied, area becomes impervious to humidity, mold, and fungus. **PATCH IT** is fast drying and will not crack or peel. **Available in Aluminum, Black and White.**

Directions: Shake can well until ball rattles & then for a further 30 seconds. For best results use & store at room temperature. Remove dust from area before application. Apply to surface from a distance of 10-12 inches. Spray evenly over desired area. Multiple coats can be applied, but allow approximately 20-30 minutes of drying time between coats. Leaks, breaks & large cracks may be repaired by coating around defect and applying a mesh such as a heavy cloth, wire mesh or fiberglass before final coating is applied. Clean actuator tip after use by inverting can and spraying until only gas comes out.
