

WINTER RINSE

Salt Neutralizer

WINTER RINSE is a industrial strength rinsing compound that has been developed specifically to cut through the dulling, white chalky residue left by ice melting chemicals. Salt residue is chemically dissolved without harming painted or finished surfaces. **WINTER RINSE** can be used on equipment to strip off corrosive residue, eliminating rust problems, maintenance headaches, and prolong the life of equipment. **WINTER RINSE** converts stubborn residues into a soluble form for fast, complete removal. **WINTER RINSE** is effective on all types of solid & liquid ice melting compounds and safe for any metal, asphalt, concrete, plastic, or painted surface.

DIRECTIONS

To remove heavy residue from equipment, trucks and trailers: Dilute 6 - 8 oz per gallon of water. Spray liberally over the equipment surfaces and allow to work for several minutes. Rinse with clean water.

For daily damp mopping: Use 1 - 4 oz. per gallon of water. Apply liberally to floor with mop, allowing the solution to work on residue for several minutes. Rinse immediately with clean water, wring mop out frequently.

To eliminate carpet stains left by ice melting residue: Use 1 - 3 oz per gallon of water in carpet extraction equipment. Do not mix with other chemicals. Do not use a hot solution.
