

# Defoamer

Concentrated  
foam controller

**DEFOAMER** is a water soluble foam controller. This product may be used around sewage treatment plants for foam knock down, dripped into waste streams where foam is a problem, and used to eliminate foam in aerator tanks. At public places such as buildings, offices, golf courses, and apartments, **DEFOAMER** can be added to fountains and waterfalls to reduce foam problems. When used properly and on a regular basis this additive eliminates foam completely. **DEFOAMER** can be mixed with detergents to reduce foam for use in scrubbers, power washers, etc. without affecting the detergency of the solution.

**Directions:** Inject, spray or drip **DEFOAMER** at a rate of 1-2 ounces per 500 gallons of water, or 1ppm. Amount of product used in dilution may be adjusted as needed to control foam build-up. **DEFOAMER** may also be sprayed through a suitable sprayer for immediate foam knock down. Contains no hazardous ingredients.

#### Areas of Use:

- \*water treatment plants
- \*waste disposal facilities
- \*sewage treatment
- \*apartment complexes
- \*golf courses
- \*office buildings
- \*warehouses
- \*janitorial services
- \*plumbing shop
- \*sewer department
- \*any fountain or waterfall feature
