

Ice Machine Cleaner

Nickel Safe Acid Cleaner

ICE MACHINE CLEANER is a fast acting, lime scale remover for ice machine evaporators. This product is formulated with corrosion inhibiting agents providing complete corrosion protection to sensitive components fabricated from nickel and tin. **ICE MACHINE CLEANER** is a concentrated blend of non-fuming, exceptionally safe and effective acids. This product is completely water soluble and can be diluted to any useful concentration.

Directions: Before attempting to use **ICE MACHINE CLEANER**, turn off refrigeration, shut off water supply, and remove all ice from the machine. Drain the sump and remove scaled components for hand cleaning. In a plastic pail, mix a solution of 5 to 15 ounces of product for each gallon of water and soak scaled components. For stubborn deposits, use a more concentrated solution and a soft brush.

Refill the ice machine and add 5 ounces of product for each gallon of system water. Circulate the solution for 10 to 30 minutes, until all visible scale has been removed. When clean, drain the cleaning solution, and flush the system thoroughly with fresh water. Install cleaned components, and sanitize according to the instructions before returning the unit to service. Discard the first batch of ice. To keep the rest of the machine clean use Omega's **MEGA POWER**.

Health	2
Flammability	0
Reactivity	0
Protection	B

Areas of Use:

- *hospitals
- *hotels
- *city & counties
- *industrial kitchens
- *apartments
- *manufacturing plants
- *retirement facilities

Appearance and odor.....	Clear liquid, mild odor
Specific Gravity.....	Concentrate - 1.127
VOC.....	N/A
NFPA Fire Rating.....	Non-flammable
