

Lava & Super Lava Plus

Granular sewer solvent

LAVA and **SUPER LAVA PLUS** granulated aluminum chip sewer solvent and drain opener removes fat and grease deposits from sewer and drain lines. **LAVA** sewer solvent products contain a powerful chemical solvent that is augmented by its catalytic and penetrating action. Aluminum chips absorb and evenly distribute heat, making **LAVA** sewer solvents perform for longer periods. Many sewer solvents emit flammable vapors which can pose fire and explosion hazards. **LAVA** products protect your employees from this danger because **LAVA** vapors are non-combustible. **SUPER LAVA PLUS** is an extra strength version of **LAVA** for tough sewer problems and large quantity applications.

Directions: LAVA: for commercial drains use 4-8 ounces and add 1-2 quarts of cold water. Let stand for 30 minutes, then rinse with cold water. Use 2-4 ounces of **LAVA** for preventive maintenance. For municipal sewer lines 4'-8' in diameter use 2 pounds. This will help in the removal of feeder roots that clog lines without harming the tree. **SUPER LAVA PLUS:** shovel 25 pounds of product into strategic manholes. If larger doses are needed, up to 50 pounds of **SUPER LAVA PLUS** may be used.

Areas of Use:

- *sewer departments
- *cities & counties
- *wastewater treatment plants
- *plumbing shops
