

No Mess

Anti seize in a handy
'shoe polish' applicator

Application of this high quality anti seize compound makes the removal of nuts, bolts, and other fasteners easy, even after exposure to extremely high temperatures (up to 2100°F). The unique applicator system on **NO MESS** allows the compound to be quickly and neatly applied to threads without dripping, mess or waste. Now you can get a tough job done with clean hands; just depress nozzle and wipe onto threads. **NO MESS** also provides outstanding protection against rust and corrosion on any type of metal, and insures easy disconnection for bolts, spark plugs, threaded fittings, gaskets and bushings, manifold studs, lugnuts, springbolts, and more.

Directions: Clean surface with a degreaser such as Omega's **MEGA POWER** or **POW** to ensure surface is free of old lubricant and dirt. Press applicator against threads to activate pressure valve to eject compound. Apply **NO MESS** evenly with applicator.

Areas of Use:

- *cities and counties
- *vehicle/equipment repair shops
- *sign shops
- *marine applications
- *construction
- *school districts
- *industrial plants
- *refineries

Health	1
Flammability	0
Reactivity	0
