

Woodman

Stainable
wood repair putty

WOODMAN is a hand kneadable, non-shrinking, epoxy putty which when cured becomes an integral part of the wooden item being repaired, rebuilt, or restored. Use **WOODMAN** for furniture repairs, moulding, frames and any other wood surfaces to fill nail holes, stripped screw holes, scratches, gouges cracks and dry rot. One hour after mixing, **WOODMAN** can be drilled, sanded, filed, tapped, machined stained, or painted. It comes in a handy "tootsie-roll" form with the curing agent encapsulated in the contrasting color base material. The putty-like consistency eliminates drips and runs, providing "no-mess" applications with no tools required for use. **WOODMAN** will not crack, shrink or rot. Worklife is 20 minutes, final cure in 45 minutes. For other surfaces that need repaired, try Omega's **STEELMAN, PLASTIKMAN, AND CONCRETEMAN** repair putty.

Directions: For best results, clean and roughen area to be repaired by filing or sanding. Twist off desired amount of **WOODMAN** and knead into a uniform color. Apply at once as hardening begins immediately. For a smooth finish, hand rub with tap water or use a damp tool prior to hardening. Wipe residue from hands and tools with Omega's **MUSCLEMAN** pre-moistened hand cleaning towels.

Areas of Use:

- *apartment complexes *building maintenance *carpentry shops *hotels
- *amusement parks *hospitals *shopping malls

Health	1
Flammability	1
Reactivity	0
Protection	B

Appearance and odor.....	Beige/White putty, Mild odor
Specific Gravity.....	Concentrate - 0.95
VOC.....	<1%
NFPA Fire Rating.....	Flammable class IIIB
