

ACID ABSORB

Industrial Absorbent for
use on Acids

This industrial absorbent will soak up most liquids and can be used on any spill or leak. Many absorbents specifically say 'not for use on acids' but **ACID ABSORB** is specially formulated for this purpose. It will neutralize acids and acid by-products, making this a truly versatile absorbent. Use **ACID ABSORB** for any spill or leak that may contain acid such as heavy duty cleaners and drain openers to quickly neutralize the acid and help increase employee safety. For added protection apply Omega's **SHIELD** protective barrier on hands and any other exposed skin before the clean-up process and when using products that contain acids.

DIRECTIONS:

Sprinkle **ACID ABSORB** onto liquid to be picked up. Sweep or scoop up and dispose of according to state and local regulations.

Health	2
Flammability	0
Physical Hazard	0
Protection	See SDS

Areas of Use:

- *Apartment Complexes
- *Building Maintenance
- *Custodial Services
- *Industrial Plants
- *Manufacturing Plants
- *Plumbing Departments
- *Steel Fabricators
- *Mechanic Shop

Appearance & Odor.....	Solid white powder with no odor
Relative Density.....	2.53 (68°F (20°C))
Net Contents.....	6 Gallon Pail
