

ANTI-SEIZE BRUSH TOP

Extremely High Temperature &
Extreme Pressure Lubricant
w/ Brush Top Applicator

ANTI-SEIZE BRUSH TOP is an industrial multi-metallic anti-seize and lubricating paste containing very finely divided metallic particles in a special no-melt semi-synthetic carrier. **ANTI-SEIZE BRUSH TOP** leaves a protective film that seals and protects metal parts even under the most extreme conditions of heat, pressure, steam and saltwater exposure. **ANTI-SEIZE BRUSH TOP** is formulated with the highest quality friction reducing solid lubricants and synthetic bases available. **ANTI-SEIZE BRUSH TOP** was designed as a preventative maintenance tool providing complete parts protection on threaded fittings and all metal surfaces subjected to harsh environments or high temperatures above 2000°F.

DIRECTIONS:

Use brush applicator to apply a thin even coat to metal surfaces. For best results remove old lubricant with Omega's **POW** degreaser before recoating area.
