

# BUGS IN A SACK

Continuous Flow

Sewer System Maintainer

**BUGS IN A SACK** is an innovative dispersal design. The powdered bacteria & enzyme mixture is packaged in a muslin sack with a 20 foot drop cord and clip. This allows for easy suspension in a lift station, manhole or grease trap. **BUGS IN A SACK** contains a powerful formulated blend of microorganisms, micro nutrients, and enzyme developed for use in bioaugmentation. These safe, non-pathogenic microbes produce a broad spectrum of effective enzyme systems which degrade organics such as, starches, carbohydrates, proteins, animal and vegetable fats, oils, and grease in waste streams. **BUGS IN A SACK** has multiple strains of bacteria to enhance waste water biology and create a stable micro-ecosystem for excellent performance. Micro nutrients and growth stimulants are blended with the product to ensure rapid establishment in thriving colonies of waste degrading microbes in waste streams, WWTPs, plumbing, grease traps, drains and septic systems. The diversity of the bacterial, & enzyme systems make this an excellent product!

### DIRECTIONS

Hang sack into water flow and tie-off drop-cord securely to prevent the sack from getting entangled in the pumping mechanism or blocking the water flow. Product is released over time, depending on water flow. **BUGS IN A SACK** eliminates fats, oils & grease along with the associated foul odors. When sack is empty simply dispose of the empty sack and replace.

20ft Cord & Clip

Health	0
Flammability	0
Physical Hazard	0
Protection	B

### Areas of Use:

- \*Hotels
- \*Schools
- \*Cities & Counties
- \*Municipal Sewage
- \*Stadiums
- \*Amusement Parks

Appearance & Odor..... Brown solid with flour dust odor.  
 Net Contents..... 15 Pounds.
