

Deter

Rodent Repellent

DETER rodent repellent is not a poison. It is a safe, all-natural, biodegradable solution designed to augment your rodent abatement program and effectively repel rats, mice, chipmunks, squirrels, raccoons, opossums, and many other rodents and pests from your home or business.

When used as directed **DETER** will repel rodents away from any protected area, including storage areas, kitchens, trash collection areas, compactors and other potential rodent food sources.

DIRECTIONS 1) Follow sprayer manufacturer cleaning instructions and caution before use. 2) For first application, sufficiently soak the area with **DETER**. Spray **DETER** in a pattern in, around and on top of your trash collection areas. Repeat as additional trash bags are added to cans, dumpsters and containers. 3) For maximum effect, repeat spraying process whenever trash receptacles, bags, cans or liners are emptied or replaced.
