

# DISH SANI CHLOR

Liquid Chlorine Rinse

for Low Temperature Dish Machines

**DISH SANI CHLOR** is a stabilized hypochlorite liquid for use in commercial low temperature ware washing machines. When used with our low temperature machine dish washing liquid it penetrates & cleans grease, fat, egg, milk, lipstick, stains & food residues completely.

Use **DISH SANI CHLOR** on dishes, china, glasses, plastic, silver and stainless steel flatware. Not for use on aluminum or other soft metals.

**DISH SANI CHLOR** oxidizes and bleaches soil and stain.

**DISH SANI CHLOR** works in hard or soft water.

**DISH SANI CHLOR** is the best choice for food service that needs the chlorine for low temperature dish washing.

### DIRECTIONS

For cleaning tableware in low-temperature ware washing machines inject **DISH SANI CHLOR** into the final rinse water at a concentration of 200 ppm available chlorine. Do not exceed 200 ppm. Air dry. Please call your **OMEGA** Sales Rep if you have any questions on setting this up. **DO NOT USE ON SILVER OR SILVER PLATE.** To insure that the available chlorine concentration does not fall below the 200 ppm, periodically test the rinse solution with a suitable test kit and adjust the dispensing rate accordingly. Consult your local **OMEGA** Specialist for technical assistance and further information on sanitizing tableware in ware washing machines.

### DO NOT MIX WITH ACID OR AMMONIA

**NOTE:** This product degrades with age. Use a chlorine test kit and increase dosage as necessary, to obtain the required level of available chlorine.
