

FRAGRANCE ROLL WILD CHERRY

Large Area Deodorizer

FRAGRANCE ROLL is a powerful odor control product effective for large enclosed rooms or sheltered areas. This fiber roll is specially treated with our advanced odor eliminating formula designed to counteract foul and persistent odors found in hospitals, gymnasiums, sewage treatment plants, stadiums, meat packing plants, transfer stations, dump sites and municipal buildings. Use **FRAGRANCE ROLL** where other products have failed or proved to be ineffective.

DIRECTIONS FOR USE:

Remove label on lid revealing vent holes that release the fragrance. Remove lid entirely for maximum fragrance release for persistent odors or to deodorize larger areas. **FRAGRANCE ROLL** can be removed from the container and hung so the air flow carries the fragrance into the affected area. This method can be very effective utilizing the air flow of the HVAC system. Position or hang the **FRAGRANCE ROLL**, either in or out of the container, directly in the path of the airflow.
