

Gel-Bac

Thickened Liquid Alive Bacteria

GEL-BAC is a special blend of enzymes, detergents and deodorants containing aerobic and anaerobic bacteria so that it works equally well in wet or dry conditions. This product eliminates odors at the source through a digestive process that liquifies organic waste to control odors in grease traps, septic systems, floor drains, garbage disposals, restrooms, animal shelters, sewage plants, and dumpster areas. **GEL-BAC**'s unique thickened formula clings to the sides of pipes and other vertical surfaces for maximum efficiency. **GEL-BAC** is safe, environmentally friendly, non-toxic, biodegradable, and USDA approved.

Directions: GENERAL ODOR CONTROL: To eliminate odors caused by vomit, urine, spoiled food, and odors found in garbage cans, locker rooms, carpets etc, apply directly to the source of the odor. DRAIN LINES, DOWN PIPES: Use **GEL-BAC** 2-4 times weekly. Start on lowest floor and work upward. Once top floor is treated, maintain by treating top floor only. Use 4 to 8 ounces depending on severity of odors. GREASE TRAPS: Use 4 to 5 ounces daily. TOILETS, URINALS AND DRINKING FOUNTAINS: Add 4-6 ounces daily under the rim, allowing product to run down into drain. Do not apply to drinking fountain spout.
