

MEGA FLOW PODS

Sewer Line Oxidizer Pod

MEGA FLOW PODS are a bio-enhancement solution that boosts organic degradation by up to 10X. Works with biological populations from bio-enzymatic additives like Omega's **MEGA BAC**. Increases the metabolic and reproductive rates of all bacteria, while enhancing waste digestion and improving water clarity. Perfect for lift stations, grease traps, aeration basins, clarifiers, and wastewater lagoons. **MEGA FLOW PODS** reduces odors, foam, and turbidity. Compatible with both aerobic and anaerobic systems. Improves the cold-weather performance of bacterial treatments. Improves penetration into heavy FOG (fats, oils, and grease). Designed for use with any biological product to increase performance. Improves bottom solids removal in wastewater lagoons, restoring capacity faster while reducing retention time requirements.

AREAS OF USE

Municipal & Industrial Sewage Systems • Lift Stations
Sewer Lines • Grease Traps • Septic Systems

DIRECTIONS

Simply drop **MEGA FLOW POD** into water flow or area where bacterial action needs enhancement. Product dissolves into standing or flowing water. **MEGA FLOW PODS** significantly improves waste digestion of bacteria or enzyme waste line treatments. Use regularly to maintain robust bacterial action in waste water lines and pools.

Areas of Use:

- * Water Treatment Facilities
- * Cities & Counties
- * Restaurants
- * Stadiums
- * Casinos
- * Amusement Parks
