

Mega Bac Apple

Bacterial Drain Maintainer & Deodorizer

MEGA BAC APPLE is a convenient liquid form of living bacteria in suspension to promote the decomposition of organic matter without the use of acids, caustics or solvents. When used in drain lines and grease traps it effectively prevents build-up of grease and organic matter which cause clogs and odors. **MEGA BAC APPLE** may be used as a deodorizer in bathrooms, trash chutes, dumpsters, drain lines, grease traps, septic tanks, holding tanks, carpets, and around urinals. The anaerobic and aerobic bacteria in **MEGA BAC APPLE** have been cultured specifically for their ability to digest waste quickly and effectively thus speeding up the normal "breakdown" process. The bacteria quickly and effectively controls odors anywhere, even pet odors in carpet and sewage odors from overflow.

Directions: For maximum benefit, use 8 ounces of **MEGA BAC APPLE** per drain each month to keep lines free flowing and to prevent buildup of waste and resulting in odors. When used properly, **MEGA BAC APPLE** will also remove soap scum and hair that may cause drain blockage. Spray into garbage areas, dumpsters and waste collection areas regularly to control odors.
