

Mega Shine

High Solids Floor Finish

MEGA SHINE provides a super high gloss while 28% solids content makes this product extremely durable and long lasting, plus it is slip resistant. **MEGA SHINE** can be buffed at low speed or burnished with a super high speed machine for an outstanding "wet look" finish. **MEGA SHINE** can also be damp mopped without dulling the shine. The initial application of this product is simple and the initial gloss is mirror-like even before buffing! Specifically formulated for use on vinyl, tile, terrazzo, ceramic, and concrete. Covers approximately 200 sq. ft. per gallon.

Directions: Remove old floor finishes with Omega's **MEGA STRIP** wax stripper. Rinse well and allow to dry. Apply three thin coats allowing each coat to dry before the next coat. Re-coat high traffic areas as desired. **FOR DAILY MAINTENANCE:** Use a mild cleaner such as Omega's **SNC** Super Neutral Cleaner to damp mop surface. Dry or spray buff as needed.
