

MELT DOWN GREASE INCINERATOR PLUS MELT DOWN BOOSTER

PRODUCT DATA SHEET

- DISSOLVES & INCINERATES FATS, OILS AND GREASE
- INCREASES OXYGEN & BOOSTS BIO-ENZYME ACTION
- 100% BIODEGRADABLE - NO TOXIC BY-PRODUCTS
- ELIMINATES FOUL ODORS COMMON IN SANITARY PITS
- CONSUMES HYDROGEN SULFIDE PREVENTING CORROSION
- SAFE IN ALL DRAINAGE, LIFT AND SEPTIC SYSTEMS

MELT DOWN GREASE INCINERATOR & LIFT STATION CLEANER

MELT DOWN is an ultra-concentrated, stabilized bio-oxidant solution devours hydrocarbons from lift stations, drain lines, and grease traps. Excellent for total system clean out prior to starting a biological or chemical preventative maintenance program such as **MEGA LIFT** or **MEGA BAC**.

MELT DOWN is a 100% biodegradable formula that devours grease, oil, fat, and other hydrocarbons on contact. **MELT DOWN** eliminates organic odors that bother neighbors and employees. The formula increases dissolved oxygen, which boosts biological metabolic activity. **MELT DOWN** scavenges poisonous hydrogen sulfide, preventing it from corroding metal surfaces

DIRECTIONS:

Lift Stations: **MELT DOWN** perfect for annual deep cleaning of lift stations or for use as an initial deep cleaning prior to starting a biological or chemical lift station maintenance program such as **MEGA LIFT** or **MEGA BAC**.

Drains & Grease Traps: **MELT DOWN** is ideally suited to remove heavy grease buildups in drain lines and grease traps. Because **MELT DOWN** is non-caustic and non-acid, it can be used in any drain or trap to provide a deep cleaning prior to starting a drain or grease trap maintenance program such as **MEGA LIFT** or **MEGA BAC**.

Use with MELT DOWN BOOSTER: First add **MELT DOWN** to the grease trap, lift station, or collection vat. Follow the **MELT DOWN** label instructions. Then slowly add **MELT DOWN BOOSTER** using the dosage chart below. Additional de-foamer may be required in some applications.

IMPORTANT: Do not pre-mix this product with **MELT DOWN**. Products must mix in the presence of a large volume of water in order to prevent a violent chemical reaction.

USAGE MIX CHART:

MELT DOWN	3 GL	5 GL	20 GL	30 GL	55 GL
BOOSTER	1 GL	2 GL	5 GL	10 GL	20 GL

GREASE PROBLEM IS INCINERATED
