

Metal Protect

Metal Parts Protector (Non-Chlorinated)

METAL PROTECT is a long-term, flexible, non-tacky, dust resistant coating that will not crack, peel, flake or chip over a wide temperature range (-40°F to +175°F). Adheres to most clean metal surfaces. **METAL PROTECT** is easily applied and removed, can be used as a corrosion preventative, it has a flexible dust retardant coating and has a thru film which allows parts to be identified.

Directions: Make sure surface is clean and dry. Spray a thin uniform film. Allow approximately 5 minutes to set up. For more severe storage conditions, a second coating can be applied within a few minutes. Complete setting of protective coating takes approximately two hours after spraying.

Health	3*
Flammability	4
Physical Hazard	0
Protection	X

Areas of Use:

- *Hotels
- *Schools
- *Cities
- *Counties
- *Amusement Parks
- *Stadiums
- *Ground/Ocean Transit
- *Seasonal Equipment
- *Public Buildings

Appearance & Odor.....	Dark Brown liquid with Solvent odor.
Specific Gravity.....	0.426 estimated
Net Contents.....	14 Oz
