

MILITARY VEHICLE FLAT BLACK

Multi-Surface Durable Paint

MILITARY VEHICLE FLAT BLACK is a high quality enamel coating that is designed to adhere well and resist rust on a variety of surfaces. The multipurpose valve allows it to be sprayed in any direction.

DIRECTIONS:

1. Prepare the surface. For good adhesion, surface must be free of dirt, grease, wax, rust or moisture. Sand or clean as necessary. Remove loose rust and scale by scraping, wire brushing or sanding. Prime bare metal surfaces with **Primal Primer Light Gray**.
2. Mix by shaking can vigorously. Allow metal ball to mix paint well for 2 minutes. Repeat during use.
3. Cover nearby areas to protect from spray mist.
4. Practice spray technique and test compatibility with surface on scrap or hidden area. Spray can upright about 6"- 8" away from object using sweeping strokes blending into previous stroke. Best results are when several light coats are applied allowing surface to become tacky between coats.
5. Clear valve after use. Turn can upside down and spray a short burst until clear. If nozzle is clogged or sprays irregularly, check for paint on opening. Scrape off with soft object and twist valve head one-half turn.
