

Oxy Foam

Metal Polish, Tarnish Remover and Preventative

OXY FOAM is a non-abrasive, foam-type cleaner/polish for removing tarnish and oxidation from brass, bronze, silver, aluminum, stainless steel and chrome. **OXY FOAM** restores a bright shiny finish to all originally bright metal surfaces leaving a residual protective coating to protect against future tarnish.

Directions: Shake well before using. Tilt can and spray foam onto damp cloth. Rub metal surface vigorously. Polish with a dry, soft cloth. If used on surfaces contacting food, after polishing, wash well with soap and water and dry thoroughly. NOTE: In applying to decorative metals or electroplated finishes, test in an inconspicuous area.
