

Penetrator

Penetrating Oil
(flammable)

This fast acting penetrating lubricant contains Teflon® and Vydax® for excellent long lasting lubrication. It will adhere to vertical surfaces and works in a broad temperature range for increased versatility. **PENETRATOR** is great for use on all surfaces that slip, slide, rub, roll, turn or pivot. This product provides fast penetration, the power to break free rusted or seized parts and will help stop corrosion. **PENETRATOR** is designed to penetrate through rust and corrosion, clean and lubricate moving parts, and improve electrical properties making it an ideal penetrating lubricant for all applications. This product works well on machinery and equipment that has been exposed to moisture.

Directions: Shake well before and during use. Spray liberally on frozen or corroded parts. For heavy corrosion, scrape away any loose or excess dirt and rust first. When reassembling, use Omega's **NO MESS** antiseize to prevent rust, corrosion and seizing again in the future.

Areas of Use:

- *Industrial factories
- *Automotive repair
- *Municipalities
- *Schools
- *Heavy machinery
- *Shop tools
- *Locks
- *Hinges
- *Pulleys
- *Bearings
- *Conveyors
