

SLIP AWAY

Biodegradable Laminate Coating

SLIP AWAY is a non-solvent coating that provides a highly effective protective coating that keeps tar, asphalt, paint overspray, graffiti, marking pens, inks, spatter, and more from adhering to surfaces so they can be cleaned easily. **SLIP AWAY** is designed to last a long time and can be used on any nonporous surface. **SLIP AWAY** is great for use on truck beds, dumpsters, glass, metal, machinery and other surfaces that come into contact with tar, asphalt, overspray, etc. that will eventually need to be cleaned off. **SLIP AWAY** is great to use as a pre-treatment for signs, restroom partitions, and other hard surfaces that may be susceptible to graffiti markings. Marks will not adhere to the surface or will simply wipe away.

Directions: All surfaces must be clean and dry. Use as is. Apply a thin, even coat of **SLIP AWAY** and work it into the surface. Remove any excess. **SLIP AWAY** dries to a beautiful luster in 10 to 20 minutes. **SLIP AWAY** fully cures in 24 hours
